## Electrochemical NH3 High-Density Transmitter via USB

## UA54-NH3-1000

- Real-time NH3 density, Temperature transmitter
- Electrochemical NH3 gas sensor embedded
- Individual Certificate included
- Operating On Windows / Linux / MacOS

- AT Command Support
- PC Recording Software (Tapaculo Lite)
- Android Recording App. (Tapaculo Mobile)

The UA54-NH3-1000 device has an electrochemical Ammonia(NH3) sensor inside. It transmits measured NH3 density and temperature information in real-time via the USB connector.
The UA Series is automatically recognized as a serial port on the operating system and accessed using the AT command. Multiple USB connections of the UA device could compose the multi-channel sensor. The sensor data is not stored in the UA, but recording in PC and Android device. 128CH real time monitoring software on pc, Tapaculo Lite is downloadable on our website(www.radionode365.com). And android real time recording application is also available from google play store. The optional RN17X model helps UA series for you to setup remote web monitoring system.

## $\triangle$ CAUTION!

- Volatile organic compounds (VOCs) should be avoided in applications where electrochemical sensors are used because they either dissolve in the electrolyte or adsorb onto the sensor's housing
- Long term exposures and high concentrations may affect the performance characteristics
- Sudden changes in humidity cause short-term transient signals
- Avoid contact with conductors.
- Static electricity can cause distorted values.
